UnitedHealthcare Dental Prior Authorization Guidance

This document provides information about prior-authorization requirements by CDT code for Children's Dental Services.

Prior-authorization of care should be requested electronically via a standard EDI transaction submission, through the UHC Dental Provider Portal at <http://www.uhc.com/dentalTX> and following the link to the Provider Sign In page for the provider portal. Prior Authorization requests may also be mailed to P.O. Box 1511, Milwaukee, WI 53201. UHC Dental will process prior-authorization requests within three (3) business days. Once a determination has been made, the prior-authorization approval will be available to view on the Provider Portal as well as written notices issued. Our Utilization Management team will mail a hard copy of the prior-authorization approval within three (3) business days of the determination for standard requests and within one (1) business day for emergency requests. If the prior-authorization request is denied, the member and provider will receive an adverse determination notice.

Approved prior-authorization requests are valid for 90 days from the date of approval. Both the member and provider will receive notification of which services were approved, as well as the expiration date of the authorization for the approved services. If orthodontic treatment does not begin within the valid 180-day period, the provider must submit a new pre-authorization request for approval.

All approvals for services are assigned a unique authorization number, which must be submitted with the claim after services are rendered. UHC Dental will not return x-rays, periodontal charting, or other related documents. Please submit duplicate sets of these documents when required to be submitted with a prior-authorization request.

Please review the UHC Dental Texas Provider Manual at the link: [Provider Manual](#) for additional information by CDT code including frequency limitations and other specifications. Providers may contact the Provider Hotline at **1-800-527-1764** with requests for assistance with the prior authorization process. Members may contact the Member Hotline at **1-877-901-7321 TTY 7-1-1** to inquire about the status of prior authorization requests and for assistance understanding the prior authorization process. Our standard Hotline Hours of Operation is 8am to 5pm Monday-Friday.

UnitedHealthcare Dental Prior Authorization Guidance

What is a “complete” Prior Authorization request?

A request for a service that includes all information/documents required to make and establish a medical necessity determination. The prior authorization (PA) requirements to consider a PA request complete are listed on our website for the requested service.

What are the “essential” information requirements needed to initiate a PA review?

- Member name
- Member number or Medicaid number
- Member date of birth
- Requesting provider name
- Requesting provider’s National Provider Identifier (NPI)
- Service requested - Current Dental Terminology (CDT), Current Procedural Terminology (CPT), or Healthcare Common Procedure Coding System (HCPCS)
- Service requested start and end date(s)
- Quantity of service units requested based on the CDT, CPT, HCPCS
- CDT coded procedures requested

What is an Incomplete PA Request?

A request for a service that is missing information to establish medical necessity as listed in the Prior Authorization

If an incomplete PA Request is received, UHC Dental will take the following actions:

- Notify the requesting provider and Member, in writing, that the PA contained missing information and provide a notice of extension (NOE) no later than 3 Business Days after the PA Received Date.
- UHC Dental may also contact the provider by telephone and obtain the information necessary to resolve the Incomplete PA Request.
- The MCO's written request for additional information must include the following:
 - A statement that the request has received but we are unable to decide about the requested services without the submission of additional information.
 - A clear and specific list and description of missing/incomplete/incorrect information or documentation that must be submitted in order to consider the request complete.
 - A due date for which the incomplete information must be received and how the provider may contact UHC Dental.
- If the information requested is not received by the end of the 3rd Business Day from the date of the notice to the provider, then the PA request may result in an Adverse Benefit Determination.
- Within 3 Business Days of the referral for Clinical review, but no later than the 10th Business Day after the PA Receive Date, UHC Dental will make a final decision on the PA request.
- A peer to peer consultation can occur at any time during the PA request process after a Clinical review.
- Final determinations must be made within 3 Business Days after the date missing information is provided to an MCO.

Category	Approval Criteria
Crowns/Onlays	<ul style="list-style-type: none"> • Criteria for cast crowns will be met only for permanent teeth needing multisurface restorations where other restorative materials have a poor prognosis. • Permanent molar teeth must have pathologic destruction to the tooth by caries or trauma, and should involve four (4) or more surfaces and two (2) or more cusps. • Permanent bicuspid teeth must have pathologic destruction to the tooth by caries or trauma, and should involve three (3) or more surfaces and at least one (1) cusp. • Permanent anterior teeth must have pathologic destruction to the tooth by caries or trauma, and must involve four (4) or more surfaces and at least 50% of the incisal edge. <p>To meet criteria, a crown must:</p> <ul style="list-style-type: none"> • Be opposed by a tooth or denture in the opposite arch or be an abutment for a partial denture. • The patient must be free from active and advanced periodontal disease. • The fee for cast crowns includes the temporary crown that is placed on the prepared tooth and worn while the permanent crown is being fabricated for permanent teeth. • Cast crowns on permanent teeth are expected to last, at a minimum, five years. <p>Criteria for Crowns following Root Canal Therapy:</p> <ul style="list-style-type: none"> • Tooth should be filled sufficiently close to the radiological apex to ensure that an apical seal is achieved. • The filling must be properly condensed/obturated. Filling material does not extend excessively beyond the apex. • The permanent tooth must be at least 50% supported in bone and cannot have mobility grades +2 or +3 <p>Crowns will NOT meet criteria if:</p> <ul style="list-style-type: none"> • Tooth has subosseous and/or furcation caries • Tooth has advanced periodontal disease • Tooth is a primary tooth (cast crowns not approved for primary teeth) • Crowns are being planned to alter vertical dimension

[Return to Procedures Grid](#)

Category	Approval Criteria
Dentures	<p>Must have all of the following:</p> <ul style="list-style-type: none"> • Remaining teeth do not have adequate bone support or are not restorable • Existing denture greater than 5 years old and unserviceable (narrative must explain why any existing denture is not serviceable or cannot be relined or rebased) <p>If a replacement full denture is requested within 5 years:</p> <ul style="list-style-type: none"> • Narrative from DDS must explain specific circumstances that necessitate replacement • Supporting documentation must include an explanation of preventative measures instituted to alleviate the need for further replacements.

[Return to Procedures Grid](#)

Category	Approval Criteria
Drugs or medicaments dispensed in the office for home use	<ul style="list-style-type: none">• May be indicated to enhance healing of surgical procedures, or reduce pain and/or risk of infection.• These include, but are not limited to oral antibiotics, oral analgesics, and topical fluoride

[Return to Procedures Grid](#)

Category	Approval Criteria
Endodontic Endosseous Implant	<ul style="list-style-type: none">• Medically necessary to retain tooth structure• Adequate periodontal and osseous support• Pre-op x-rays must show apex of root• Free from periodontal disease <p>Intentional Re-implantation</p> <ul style="list-style-type: none">• Persistent periradicular pathosis following endodontic treatment• Nonsurgical retreatment is not possible or has an unfavorable prognosis• Periradicular surgery is not possible or involves a high degree of risk to adjacent anatomical structures

[Return to Procedures Grid](#)

Category	Approval Criteria
Fixed Partial Dentures – Pontics and Retainers (bridges)	<ul style="list-style-type: none"> • At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease). • The space cannot be filled with a removable partial denture. • The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch). • Each abutment or each pontic constitutes a unit in a bridge. • Retainer teeth must have a good prognosis

[Return to Procedures Grid](#)

Category	Approval Criteria
Flap Procedures	<ul style="list-style-type: none">• The presence of moderate to deep probing depths• Moderate/severe gingival enlargement or extensive areas of overgrowth• Loss of attachment• The need for increased access to root surface and/or alveolar bone when previous non-surgical attempts have been unsuccessful• The diagnosis of a cracked tooth, fractured root or external root resorption when this cannot be accomplished by non-invasive methods

[Return to Procedures Grid](#)

Category	Approval Criteria
General Anesthesia and Intravenous (IV) Sedation	<ul style="list-style-type: none"> • A completed Criteria for Dental Therapy Under General Anesthesia form with a minimum score of 22 • Treatment plan • Narrative describing medical necessity. For children 6 and under, a narrative unique to the client, detailing reasons for the proposed level of anesthesia (indicate procedure code D9222/D9223). The narrative must include history of prior treatment, failed attempts at other levels of sedation, behavior in the dental chair, proposed restorative treatment (tooth ID and surfaces), urgent need to provide comprehensive dental treatment based on extent of diagnosed dental caries, and/or any relevant medical condition(s). • Complete anesthesia report including start and stop times is required with claim for review of payment • Diagnostic quality radiographs or photographs • When appropriate radiographs or photographs cannot be taken prior to general anesthesia, the narrative must support the reasons for an inability to perform diagnostic services. For these special cases that receive authorization, diagnostic quality labeled radiographs or photographs will be required for payment. • Treatment rendered under emergency conditions, when authorization is not possible, will still require submission of treatment plan and narrative of medical necessity with the claim for review for payment <p>Utilizing a Dental Anesthesiologist:</p> <ul style="list-style-type: none"> • If the treating dentist is utilizing a dental anesthesiologist, the treating dentist would have already submitted the above clinical records under a prior authorization request for D9999 for review. • If that is the case, at the time the dental anesthesiologist submits the claim for the rendered anesthesia services, the clinical consultants will be looking to review the following submission requirements from the dental anesthesiologist: <ul style="list-style-type: none"> ○ A copy of the approved prior authorization letter of D9999 ○ One unit of D9222 and appropriate units of D9223

- Complete anesthesia report with start and stop times (aligning with the requested units of anesthesia)

If the minimum score of 22 is NOT met on the Criteria for Dental Therapy Under General Anesthesia form, requests for general anesthesia or IV sedation may still be authorized (for covered procedures) if any of the following criteria are met:

Extensive or complex oral surgical procedures such as:

- Impacted wisdom teeth.
- Surgical root recovery from maxillary antrum.
- Surgical exposure of impacted or unerupted cuspids.
- Radical excision of lesions in excess of 1.25 cm.

And/or one of the following medical conditions:

- Medical condition(s) which require monitoring (e.g. cardiac problems, severe hypertension).
- Underlying hazardous medical condition (cerebral palsy, epilepsy, mental retardation, including Down's syndrome) which would render patient noncompliant.
- Documented failed sedation or a condition where severe periapical infection would render local anesthesia ineffective.
- Patients 6 years old and younger with extensive procedures to be accomplished

Comprehensive Medically Necessary Orthodontic Services

[Return to Procedures Grid](#)

Comprehensive medically necessary orthodontic services are a covered benefit for:

Texas Children's Medicaid Members:

Members who have a severe handicapping malocclusion or special medical conditions including cleft palate, post-head trauma injury involving the oral cavity, and/or skeletal anomalies involving the oral cavity.

CHIP Members:

CHIP members would **only** qualify for Orthodontic treatment under this program if:

- 1) Member's record clearly identifies a cleft palate or craniofacial anomaly involving the oral cavity, or
- 2) Member has history of, or is scheduled for, orthognathic surgery to correct a severe malocclusion, **and** meet, at a minimum, the criteria requirements for Level III orthodontic treatment (see Level III section below)

Orthodontic services that are performed solely for cosmetic purposes are not a benefit of Texas Medicaid.

Approved orthodontic treatment plans must be initiated before the client's loss of Medicaid eligibility or the 21st birthday. Services cannot be added or approved after Texas Medicaid/Texas Health Steps (THSteps) eligibility has expired.

Members enrolled in the Dental Contractor's plan for at least one month and are receiving orthodontic treatment and either ages out or loses eligibility; the Dental Contractor is responsible for completion of payment for the course of treatment. The only exception is if the Member is disenrolled with cause but is still Medicaid eligible.

Clients who are 14 years of age or younger must be accompanied to all medical and dental checkups/visits by the client's parent, legal guardian, or an adult authorized by the parent or legal guardian. The authorized adult may be the client's relative. The individual accompanying the client must wait for the client while the appointment takes place. This policy does not apply to services provided by a school health clinic, Head Start program, or child-care facility if the clinic, program, or facility providing the services (Human Resources Code):

- Obtains valid written consent for services from the client's parent or legal guardian within the one-year period prior to the date the services are provided.
- Encourages parental involvement in, and the management of, the health care of the children receiving services from the clinic, program, or facility.

As with all Medicaid services, a provider acknowledges compliance with all Medicaid requirements when he or she submits a claim for reimbursement.

Orthodontic terminology and extent of orthodontic services are based on the American Dental Association's Current Dental Terminology (CDT) definitions and explanations of the orthodontic codes utilized within this policy. The following definitions of dentition established by the CDT manual are recognized by the Children's Medicaid dental services:

- Primary Dentition: Teeth developed and erupted first in order of time.
- Transitional Dentition: The final phase of the transition from primary to adult teeth, in which the deciduous molars and canines are in the process of shedding and the permanent successors are emerging.
- Adolescent Dentition: The dentition that is present after the normal loss of primary teeth and prior to cessation of growth that would affect orthodontic treatment.
- Adult Dentition: The dentition that is present after the cessation of growth that would affect orthodontic treatment.

Place of Service

1 Office

Prior Authorization

Prior authorization is required for all Levels of orthodontic treatment. Prior authorization includes the number of monthly visits and expected completion time according to the corresponding treatment level.

A pre-orthodontic treatment examination to monitor growth and development (D8660) is considered part of any comprehensive oral evaluation (D0150) or periodic oral evaluation (D0120).

The following documentation must be submitted with the request for prior authorization for Level I, II, III and IV orthodontic services:

- ADA 2012 or newer claim form with service codes noted
- Digital diagnostic models or other type of 3D diagnostic images
- Radiographs (x-rays)
- Cephalometric radiographic image with tracings
- Photographs
- Treatment plan
- **For CHIP Clients Only** – a copy of the medical prior authorization approval letter for surgery

Levels of Orthodontia Services

UHC Dental recognizes four orthodontic service levels for severe handicapping malocclusion, and each requires a different amount of time for treatment.

Severe handicapping malocclusion is defined as an occlusion that is severely functionally compromised and is described in

detail in Levels I, II, III and IV.

Orthodontia Provider Type(s) Based on Levels:

All dental providers must comply with the rules and regulations of the Texas State Board of Dental Examiners (TSBDE), including the standards for documentation and record maintenance that are stated in the TSBDE Rules 108.7 Minimum Standards of Care, General and 108.8 Records of Dentist.

Dentists (DDS, DMD) who want to provide any of the four levels of orthodontic services addressed in this policy must be enrolled as a dentist or orthodontist in Texas Health Steps (THSteps) and must have the qualifications listed below for the relevant level of service:

Provider Type	Level of Orthodontic Service That Can Be Provided	Qualifications
Provider Type 90	Level I or II	<ul style="list-style-type: none">• Completion of pediatric dental residency; or• A minimum of 200 hours of continuing dental education in orthodontics.
Provider Type 48	Level I, II, III, or IV	Dentists who are Board eligible or board certified by an ADA recognized orthodontic specialty board.

Orthodontia Levels I, II, III and IV:

LEVEL I:				
CDT Codes	Provider Type	Eligible Age Group	Treatment Length	Exceptions to Expected Treatment Time
D8210 Removable Appliance Therapy	Type 48 Type 90	3-13	Up to 10 monthly visits and are expected to be completed within 12 months unless an exception is	May allow for additional treatment months for one of the following circumstances: <ul style="list-style-type: none">•The client is the child of a migrant farm worker.
D8220 Fixed Appliance Therapy				

			granted.	<ul style="list-style-type: none"> The client's orthodontic services were delayed as a result of temporarily being in state custodial care (foster care).
Criteria				
<p>Level I: Dedicated to resolution of early signs of handicapping malocclusion in the early mixed dentition which may significantly impact the health of the developing dentition, alveolar bone, and symmetrical growth of the skeletal framework. (Presence of the maxillary and mandibular permanent molars, and the maxillary and mandibular incisors fully erupted, and deciduous teeth shall constitute the early mixed dentition.)</p> <p>**Exceptions for cases of mixed dentition may be considered when the treatment plan includes extractions of remaining primary teeth or in the case of cleft palate.</p> <ul style="list-style-type: none"> Anterior crossbite that is associated with clinically apparent severe gingival inflammation and/or gingival recession, or severe enamel wear. Posterior crossbite with an associated midline deviation and asymmetric closure pattern. 				

LEVEL II:				
CDT Codes	Provider Type	Age Group	Treatment Length	Exceptions to Expected Treatment Time
D8050 Interceptive orthodontic treatment of the primary dentition	Type 48 Type 90	3-13	Up to 22 monthly visits and are expected to be completed within 24 months unless an exception is granted.	May allow for additional treatment months for one of the following circumstances: <ul style="list-style-type: none"> The client is the child of a migrant farm worker. The client's orthodontic services were delayed as a result of temporarily being in state custodial care
D8060 Interceptive orthodontic treatment of the transitional dentition				
D8070 Comprehensive orthodontic				

treatment of the transitional dentition				(foster care).
Criteria				
<p>Level II: Dedicated to the resolution of handicapping malocclusion in the transitional dentition; the final phase of the transition from primary to adolescent dentition wherein the succadaneous permanent teeth are emerging or about to emerge.</p> <p>FOUR of the following conditions must be clearly apparent in the supporting documentation:</p> <ul style="list-style-type: none"> • Full cusp Class II malocclusion with the distal buccal cusp of the maxillary first molar occluding in the mesial buccal groove of the mandibular first molar. • Full cusp Class III malocclusion with the maxillary first molar occluding in the embrasure distal to the mandibular first molar or on the distal incline of mandibular molar distal buccal cusp. • Overbite measurement shall be in excess of 5 mm. • Overjet measurement shall be in excess of 8 mm. • More than four congenitally absent teeth, one or more of which shall include an anterior tooth/or teeth. • Anterior crowding shall be in excess of 6 mm. in the mandibular arch. • Anterior cross bite of at least two of the four maxillary incisors. • Generalized spacing in both arches of greater than 6 mm. in each arch. • Recognition of early impacted maxillary canine or canines. Radiographs shall support the diagnosis demonstrating a severe mesial angulation of the erupting canine and the crown of the canine superimposed and crossing the image of the maxillary lateral incisor. 				
Additional Services				
<p>There may be extenuating circumstances that warrant additional treatment time, including but not limited to cases of craniofacial anomalies and cleft palate. In the event that the client requires additional treatment, the provider may request prior authorization for additional services. Each case will be reviewed and evaluated on a case by case basis for medical necessity.</p> <p>Providers must complete and submit the following for consideration for additional services:</p> <ul style="list-style-type: none"> • A 2012 or newer ADA claim form with procedure code D8670 for additional monthly orthodontic visits, if needed. • On the ADA Claim form identify the reason for the needed additional monthly visits and identify the number of visits being requested. • The name of the additional appliance in the case of a cleft palate treatment plan, if needed. • Recent radiographs (x-rays) showing the progress made to date. • Current photographs • Current treatment plan 				
LEVEL III				
<p>❖ Clients are eligible for either Level II, III or IV orthodontic services once per lifetime.</p>				

<p>❖ Clients identified as cleft/craniofacial cases are eligible for more than one level of orthodontic services (Level II, III and IV) per lifetime.</p>				
CDT Codes	Provider Type	Age Group	Treatment Length	Exceptions to Expected Treatment Time
D8080 Comprehensive orthodontic treatment of the adolescent dentition	Type 48	13-20	Up to 22 monthly visits and are expected to be completed within 36 months unless an exception is granted.	May allow for additional treatment months for one of the following circumstances: <ul style="list-style-type: none"> • The client is the child of a migrant farm worker. • The client's orthodontic services were delayed as a result of temporarily being in state custodial care (foster care).
Criteria				
<p>Level III: Dedicated to resolution of handicapping malocclusion in the adolescent or adult dentition; complete eruption of the permanent dentition with the possible exception of full eruption of the second molars.</p> <p>FOUR of the following conditions must be clearly apparent in the supporting documentation.</p> <ul style="list-style-type: none"> • Full cusp Class II molar malocclusion as described in Level II. • Full cusp Class III molar malocclusion as described in Level II. • Anterior tooth impaction; unerupted with radiographic evidence to support a diagnosis of impaction (lack of eruptive space, angularly malposed, totally imbedded in the bone) as compared to ectopically erupted anterior teeth which may be malposed but has erupted into the oral cavity and is not a qualifying element. • Anterior crowding shall be in excess of 6mm in the mandibular arch. • Anterior open bite shall demonstrate that all maxillary and mandibular incisors have no occlusal contact and are separated by a measurement in excess of 6 mm. • Posterior open bite shall demonstrate a vertical separation by a measurement in excess of 5 mm. of several posterior teeth and not be confused with the delayed natural eruption of a few teeth. • Posterior cross bite with an associated midline deviation and mandibular shift, a Brodie bite with a mandibular arch totally encumbered by an overlapping buccally occluding maxillary arch, or a posterior maxillary arch totally lingually malpositioned to the mandibular arch shall qualify. • Anterior cross bite shall include more than two incisors in cross bite and demonstrate gingival inflammation, gingival recession, or severe enamel wear. • Overbite shall be in excess of 5 mm. 				

- Overjet shall be in excess of 8 mm.

Additional Services

There may be extenuating circumstances that warrant additional treatment time, including but not limited to cases of craniofacial anomalies and cleft palate. In the event that the client requires additional treatment, the provider may request prior authorization for additional services. Each case will be reviewed and evaluated on a case by case basis for medical necessity.

Providers must complete and submit the following for consideration for additional services:

- A 2012 or newer ADA claim form with procedure code D8670 for additional monthly orthodontic visits, if needed.
- On the ADA Claim form identify the reason for the needed additional monthly visits and identify the number of visits being requested.
- The name of the additional appliance in the case of a cleft palate treatment plan, if needed.
- Recent radiographs (x-rays) showing the progress made to date.
- Current photographs
- Current treatment plan

LEVEL IV

- ❖ Clients are eligible for either Level II, III or IV orthodontic services once per lifetime.
- ❖ Clients identified as cleft/craniofacial cases are eligible for more than one level of orthodontic services (Level II, III and IV) per lifetime.

CDT Codes	Provider Type	Age Group	Treatment Length	Exceptions to Expected Treatment Time
D8090 Comprehensive orthodontic treatment of the adult dentition	Type 48	13-20	Up to 22 monthly visits and are expected to be completed within 36 months unless an exception is granted.	May allow for additional treatment months for one of the following circumstances: <ul style="list-style-type: none"> •The client is the child of a migrant farm worker. •The client's orthodontic services were delayed as a result of temporarily being in state custodial care (foster care).
Criteria				
Level IV: Dedicated to resolution of handicapping malocclusion in the adult dentition; complete eruption of the permanent dentition. Documentation shall be submitted by an Oral Surgeon justifying the medical necessity of a surgical approach to treatment.				

- Non-functional Class II malocclusion.
- Non-functional Class III malocclusion

The correction of the malocclusion shall be beyond that of orthodontics alone and shall require pre-orthodontic and post-orthodontic procedures in conjunction with orthognathic surgery. The patient's medical needs shall be based on function and not esthetics.

Additional Services

There may be extenuating circumstances that warrant additional treatment time, including but not limited to cases of craniofacial anomalies and cleft palate. In the event that the client requires additional treatment, the provider may request prior authorization for additional services. Each case will be reviewed and evaluated on a case by case basis for medical necessity.

Providers must complete and submit the following for consideration for additional services:

- A 2012 or newer ADA claim form with procedure code D8670 for additional monthly orthodontic visits, if needed.
- On the ADA Claim form identify the reason for the needed additional monthly visits and identify the number of visits being requested.
- The name of the additional appliance in the case of a cleft palate treatment plan, if needed.
- Recent radiographs (x-rays) showing the progress made to date.
- Current photographs
- Current treatment plan

Reimbursement

Reimbursement for orthodontic treatment is based on submission of the appropriate procedure code(s).

Prior authorized procedure codes: D8210, D8220, D8050, D8060, D8070, D8080 or D8090

- Will be considered for payment as the initial reimbursement when all bands, brackets and/or appliances have been placed and active treatment has been initiated.
- The diagnostic workup is considered part of this initial reimbursement.

Procedure code D8670: Periodic Orthodontic Treatment Visit

- Limited to one service per month.
- The total number of monthly adjustments allowed will vary by approved level of orthodontic treatment.
- May not be submitted for an observational visit only.

Procedure code D8680: Orthodontic retention - removal of appliances, construction and placement of retainer(s)

- Will be considered for payment as the last payment when orthodontic treatment is complete and has been prior authorized.

Denied cases will not be reimbursed.

Completion of All Levels of Orthodontic Treatment

- Prior authorization is required for completion of treatment (last payment) and must be reviewed for proof of completion of case.
- Providers must use procedure code D8680 for the removal of all bands, brackets and appliances. Orthodontic services Levels II, III and IV must include the construction of both maxillary and mandibular retainers.
- The following documentation must be submitted with the request for prior authorization:
 - A 2012 or newer ADA claim form with procedure code D8680
 - Post treatment panoramic radiographic image
 - Photographs
 - A signed statement from the treating Provider indicating that treatment is complete

Transfer/Continuation of Orthodontic Care

There are 3 main scenarios that this document will address as far as continuation or transfer of a member's on-going orthodontic treatment:

- 1) Provider to Provider (within UHC Dental)
- 2) Other DMO to UHC Dental
- 3) Private/Commercial Arrangement to UHC Dental

1) Provider to Provider (within UHC Dental):

This section is for situations in which the Orthodontic care of a Medicaid eligible member is transferred from one UHC Dental provider to another UHC Dental provider (in which there is record of the approval of the original orthodontic treatment)

Prior authorization issued to a provider for orthodontic services is not transferable to another provider. The new provider must request a new prior authorization to complete the treatment initiated by the original provider.

The new provider must obtain his/her own records, which must be submitted with the request for transfer of services.

- Documentation submission requirements:
 - All the documentation that is required for the original request
 - ADA 2012 or newer claim form with procedure code D8999 and the number of remaining visits (D8670) needing to be rendered.
 - The reason the client left the previous provider and a Narrative noting the treatment status.

2) Other DMO to UHC Dental:

This section is for situations in which the Orthodontic care of a Medicaid eligible member is transferred from another TX Dental Medicaid organization (DMO) to the UHC Dental DMO.

Continuation of a case for a client that began with another DMO will be considered for those members with an active unexpired prior authorization for orthodontic treatment, up to the quantity and validity as approved by the previous carrier.

- Documentation submission requirements:
 - A completed Orthodontic Continuation of Care Form. See Appendix K for this form.
 - ADA 2012 or newer claim form with procedure code D8999 and the number of remaining visits (D8670) needing to be rendered.
 - A copy of the Member's prior approval including the total approved case fee and payment structure
 - Detailed payment history

3) Private/Commercial Arrangement to UHC Dental:

This section is for situations in which the Orthodontic care of a currently Medicaid eligible member is transferred to from a Private/Commercial Arrangement to UHC Dental DMO, only if the client began treatment prior to becoming Medicaid eligible.

Continuation of an orthodontic case for a client that began treatment through a private arrangement will not be considered for prior authorization if the client began treatment while Medicaid eligible and will be denied.

Continuation of an orthodontic case for a client that began through a private/commercial arrangement will also need medical necessity review, and must meet Medicaid criteria for medical necessity of orthodontic treatment

- Documentation submission requirements:
 - A completed Orthodontic Continuation of Care Form. See Appendix K for this form.
 - ADA 2012 or newer claim form with procedure code D8999 and the number of remaining visits (D8670) needing to be rendered.
 - A copy of the Member's prior approval including the total approved case fee and payment structure
 - Detailed payment history
- These additional submission documents will also be required in order to review for medical necessity when an ortho case initiated in a private/commercial arrangement is being considered for continuation of care coverage:
 - Digital diagnostic models or other type of 3D diagnostic images
 - Radiographs (x-rays)
 - Cephalometric radiographic image with tracings
 - Photographs
 - Treatment plan
 - **For CHIP Clients Only** – a copy of the medical prior authorization approval letter for surgery

Premature Termination of Comprehensive Orthodontic Services

Premature termination of comprehensive orthodontic treatment by the originally treating provider is included in the

comprehensive services.

Premature termination of orthodontic services includes all of the following:

- Removal of brackets and arch wires
- Other special orthodontic appliances
- Fabrication of special orthodontic appliances
- Delivery of orthodontic retainers

Premature removal of an orthodontic appliance must be prior authorized, and requests must include:

• A 2012 or newer ADA claim form with procedure code D8680, to identify that all bands, brackets and appliances have been removed and applicable orthodontic retainers have been delivered.

• A release form (or copy of) that must be signed by the parent or legal guardian, or by the client if he/she is 18 years of age or older or an emancipated minor.

• One of the following must be documented on the prior authorization request:

- The client is uncooperative or is non-compliant
- The client requested the removal of the orthodontic appliance(s)
- The client has requested the removal due to extenuating circumstances to include, but not limited to:

- Incarceration
- Mental health complications with a recommendation from the treating physician
- Foster Care placement
- Child of a Migrant Farm Worker, with the intent to complete treatment at a later date if Medicaid eligibility for orthodontic services continues

NOTE: A Member for whom removal of an appliance has been authorized due to the above, will be eligible for completion of their Medicaid orthodontic services if the services are re-initiated while Medicaid eligible. Should the Member choose to have the appliances removed for reasons other than those listed above as due to extenuating circumstances the client may not be eligible for any additional Medicaid orthodontic services.

• The requesting provider is responsible for removal of the orthodontic appliances, final records, and fabrication and delivery of retainers at the time of premature removal or at any future time should the client present to the treating provider's office.

• In the case of an authorized premature termination of treatment, the provider should submit procedure code D8680 to identify that all bands, brackets and appliances have been removed and applicable orthodontic retainers have been delivered.

Documentation

All orthodontic treatment visits must be documented in the client's dental record and available for review.

Guía de autorización previa Dental de UnitedHealthcare

Este documento proporciona información sobre los requisitos de autorización previa por código CDT para servicios dentales infantiles.

La autorización previa de la atención debe solicitarse electrónicamente a través del Portal de Proveedores Dentales UHC en <http://www.uhc.com/dentalTX> y siguiendo el vínculo a la página Inicio de sesión del Proveedor para el portal del proveedor. Las solicitudes de autorización previa también se pueden enviar por correo a P.O. Box 1511, Milwaukee, WI 53201. UHC Dental procesará solicitudes de autorización previa en un plazo de tres (3) días hábiles. Una vez que se haya tomado una determinación, la aprobación previa de la autorización estará disponible para ver en el Portal del Proveedor, así como avisos escritos emitidos. Nuestro equipo de Gestión de Utilización enviará por correo una copia impresa de la aprobación previa a la autorización dentro de los tres (3) días hábiles siguientes a la determinación de solicitudes estándar y dentro de un (1) día hábil para las solicitudes de emergencia. Si se deniega la solicitud de autorización previa, el miembro y el proveedor recibirán un aviso de determinación adversa.

Las solicitudes de autorización previa aprobadas son válidas durante 90 días a partir de la fecha de aprobación. Tanto el miembro como el proveedor recibirán una notificación de qué servicios fueron aprobados, así como la fecha de vencimiento de la autorización para los servicios aprobados. Si el tratamiento de ortodoncia no comienza dentro del período válido de 180 días, el proveedor debe presentar una nueva solicitud de aprobación previa a la autorización.

A todas las aprobaciones de servicios se les asigna un número de autorización único, que debe enviarse con la reclamación después de prestar los servicios. UHC Dental no devolverá radiografías, gráficos periodontales u otros documentos relacionados. Envíe conjuntos duplicados de estos documentos cuando sea necesario que se envíen con una solicitud de autorización previa.

Por favor revise el Manual del Proveedor UHC Dental Texas en el enlace: [Manual del proveedor](#) para información adicional por código CDT incluyendo limitaciones de frecuencia y otras especificaciones. Los proveedores pueden comunicarse con la línea directa del proveedor al **1-800-527-1764** con solicitudes de asistencia con el proceso de autorización previa. Los Miembros pueden comunicarse con la Línea Directa para Miembros al **1-877-901-7321 TTY 7-1-1** para preguntar sobre el estado de las solicitudes de autorización previa y para obtener asistencia para entender el proceso de autorización previa. Nuestra línea directa estándar horario de operación es de 8am a 5pm De lunes a viernes.

Guía de autorización previa dental de UnitedHealthcare

¿Qué es una solicitud de autorización previa "completa"?

Una solicitud de un servicio que incluya toda la información/documentos necesarios para tomar y establecer una determinación de necesidad médica. Los requisitos de autorización previa (PA) para considerar una solicitud de pa completa se enumeran en nuestro sitio web para el servicio solicitado.

¿Cuáles son los requisitos de información "esenciales" necesarios para iniciar una revisión de la AP?

- Nombre del miembro
- Número de miembro o número de Medicaid
- Fecha de nacimiento de los miembros
- Solicitar el nombre del proveedor
- Solicitud del Identificador Nacional de Proveedores (NPI) del proveedor.
- Servicio solicitado - Terminología dental actual (CDT), terminología procesal actual (CPT) o sistema de codificación de procedimientos comunes de atención médica (HCPCS)
- Fecha(s) de inicio y finalización solicitada(s) del servicio
- Cantidad de unidades de servicio solicitadas sobre la base del CDT, CPT, HCPCS
- Procedimientos codificados por CDT solicitados

¿Qué es una solicitud de PA incompleta?

Una solicitud de un servicio a la cual le falta información para establecer la necesidad médica como se indica en la Autorización Previa

Si se recibe una solicitud de PA incompleta, UHC Dental con tomar las siguientes acciones:

- Notifique al proveedor solicitante y al Miembro, por escrito, que la AP contenía información que faltaba y proporcionar un aviso de extensión (NOE) a más tardar 3 días hábiles después de la fecha de recepción de la AP.
- UHC Dental también puede ponerse en contacto con el proveedor por teléfono y obtener la información necesaria para resolver la solicitud de PA incompleta.
- La solicitud escrita de información adicional del MCO debe incluir lo siguiente:
 - Una declaración que la solicitud ha recibido, pero no podemos decidir sobre los servicios solicitados sin la presentación de información adicional.
 - Una lista clara y específica y una descripción de la información o documentación faltante/incompleta/incorrecta que debe presentarse para considerar completa la solicitud.
 - Una fecha de vencimiento para la cual se debe recibir la información incompleta y cómo el proveedor puede comunicarse con UHC Dental.
- Si la información solicitada no se recibe al final del tercer día hábil a partir de la fecha del aviso al proveedor, entonces la solicitud de PA puede resultar en una determinación adversa de beneficios.
- Dentro de los 3 días hábiles siguientes a la remisión para la revisión clínica, pero a más tardar el décimo día hábil después de la fecha de recepción de la PA, UHC Dental tomará una decisión final sobre la solicitud de pa.
- Una consulta de doctor a doctor puede ocurrir en cualquier momento durante el proceso de solicitud pa después de una revisión clínica.
- Las determinaciones finales deben realizarse dentro de los 3 días hábiles posteriores a la fecha en que se proporciona la información que falta a un MCO.

Servicios integrales de ortodoncia médica necesarios

[Volver a la cuadrícula de procedimientos](#)

Los servicios integrales de ortodoncia médica necesarios son un beneficio cubierto para:

Miembros de Medicaid para Niños de Texas:

Miembros que tienen una maloclusión de hándicap grave o condiciones médicas especiales, incluyendo paladar hendido, lesión de trauma post-cabeza que involucra la cavidad oral, y / o anomalías esqueléticas que involucran la cavidad oral.

Miembros de CHIP:

Los miembros de CHIP **solo** calificarían para el tratamiento de ortodoncia bajo este programa si:

1. El expediente del Miembro identifica claramente un paladar hendido o anomalía craneofacial que involucra la cavidad oral, o
2. Miembro tiene antecedentes de, o está programado para, cirugía ortognática para corregir una maloclusión grave, **y cumplir**, como mínimo, los requisitos de criterios para el tratamiento ortodoncia de nivel III (ver sección de nivel III a continuación)

Los servicios de ortodoncia que se realizan únicamente con fines cosméticos no son un beneficio de Texas Medicaid.

Los planes de tratamiento de ortodoncia aprobados deben iniciarse antes de la pérdida de elegibilidad para Medicaid por parte del cliente o el 21 cumpleaños. Los servicios no se pueden agregar ni aprobar después de que la elegibilidad de Texas Medicaid/Texas Health Steps (THSteps) haya expirado.

Los miembros inscritos en el plan del Contratista Dental durante al menos un mes y están recibiendo tratamiento de ortodoncia y envejecen o pierden elegibilidad; el Contratista Dental es responsable de completar el pago por el curso del tratamiento. La única excepción es si el Miembro está dado de baja por causa, pero sigue siendo elegible para Medicaid.

Los clientes que tengan 14 años o menos deben estar acompañados a todos los chequeos/visitas médicas y dentales por el padre del cliente, tutor legal o un adulto autorizado por el parente o tutor legal. El adulto autorizado puede ser el parente del cliente. La persona que acompaña al cliente debe esperar al cliente mientras se lleva a cabo la cita. Esta política no se aplica a los servicios proporcionados por una clínica de salud escolar, programa Head Start o centro de cuidado infantil si la clínica, programa o instalación que proporciona los servicios (Código de Recursos Humanos):

- Obtiene un consentimiento por escrito válido para los servicios del parente o tutor legal del cliente dentro del período de un año antes de la fecha en que se proporcionan los servicios.
Alienta la participación de los padres en la atención médica de los niños que reciben servicios de la clínica, programa o centro. Al igual que con todos los servicios de Medicaid, un proveedor reconoce el cumplimiento de todos los requisitos de Medicaid

cuando envía una reclamación de reembolso.

La terminología ortodoncia y el alcance de los servicios de ortodoncia se basan en las definiciones y explicaciones de la Terminología Dental Actual (CDT) de la Asociación Dental Americana y las explicaciones de los códigos ortodoncia utilizados dentro de esta política. Las siguientes definiciones de dentición establecidas por el manual de CDT son reconocidas por los servicios dentales de Medicaid para Niños:

- Dentición primaria: Los dientes se desarrollaron y estallaron primero en orden de tiempo.
- Dentición transicional: La fase final de la transición de los dientes primarios a los dientes adultos, en la que los molares y caninos caducifolios están en proceso de desprendimiento y los sucesores permanentes están emergiendo.
- Dentición adolescente: La dentición que está presente después de la pérdida normal de dientes primarios y antes del cese del crecimiento que afectaría el tratamiento ortodoncia.
- Dentición para adultos: La dentición que está presente después del cese del crecimiento que afectaría el tratamiento ortodoncia.

Lugar de servicio

1 oficina

Autorización previa

Se requiere autorización previa para todos los niveles de tratamiento de ortodoncia. La autorización previa incluye el número de visitas mensuales y el tiempo de finalización previsto según el nivel de tratamiento correspondiente.

Un examen de tratamiento pre-ortodoncia para monitorear el crecimiento y el desarrollo (D8660) se considera parte de cualquier evaluación oral integral (D0150) o evaluación oral periódica (D0120).

La siguiente documentación debe presentarse con la solicitud de autorización previa para los servicios de ortodoncia de nivel I, II, III y IV:

- ADA 2012 o formulario de reclamación más nuevo con códigos de servicio señalados
- Modelos de diagnóstico digital u otro tipo de imágenes diagnósticas 3D
- Radiografías (radiografías)
- Imagen radiográfica cefalométrica con trazados
- Fotografías
- Plan de tratamiento
- **Solo para Clientes con CHIP** – una copia de la carta de aprobación de autorización previa médica para la cirugía

Niveles de Servicios de Ortodoncia

UHC Dental reconoce cuatro niveles de servicio de ortodoncia para la maloclusión de hándicap grave, y cada uno requiere una cantidad diferente de tiempo para el tratamiento. La maloclusión hándicap se define como una oclusión que está gravemente comprometida funcionalmente y se describe en los niveles I, II, III y IV

Tipos de proveedor de ortodoncia basados en niveles:

Todos los proveedores dentales deben cumplir con las reglas y regulaciones de la Junta Estatal de Examinadores Dentales de Texas (TSBDE), incluyendo los estándares de documentación y mantenimiento de registros que se establecen en las Reglas TSBDE 108.7 Estándares Mínimos de Atención, General y 108.8 Registros de Dentista.

Los Dentistas (DDS, DMD) que deseen proporcionar cualquiera de los cuatro niveles de servicios de ortodoncia abordados en esta política deben estar inscritos como dentista u ortodoncista en Texas Pasos de salud (THSteps) y deben tener las calificaciones enumeradas a continuación para el nivel de servicio relevante:

Tipo de proveedor	Nivel de servicio de ortodoncia que se puede Proporcionado	Calificaciones
Tipo de proveedor 90	Nivel I o II	<ul style="list-style-type: none">Finalización de la residencia dental pediátrica; oUn mínimo de 200 horas de educación dental continua en ortodoncia.
Tipo de proveedor 48	Level I, II, III, or IV	Dentistas que son elegibles de la Junta o la junta certificada por una junta especializada de ortodoncia reconocida por ADA.

Niveles I, II, III y IV de Ortodoncia:

NIVEL I:

- La finalización de los servicios de ortodoncia de nivel I no descalifica los futuros servicios de ortodoncia de nivel II, III o IV.
- Los servicios de ortodoncia de nivel I no estarán autorizados previamente si hay una indicación de que el cliente calificará para los servicios de ortodoncia de nivel II, III o IV en el futuro.

Códigos CDT	Tipo de proveedor	Grupo de edad elegible	Duración del tratamiento	Excepciones al tiempo de tratamiento esperado
D8210 Terapia de electrodomésticos extraíbles	Tipo 48 Tipo 90	3-13	Hasta 10 visitas mensuales y se espera que se completen en un plazo de 12 meses a menos que una excepción es concedida	Puede permitir meses de tratamiento adicionales para una de las siguientes circunstancias:
D8220 Fijo Terapia de electrodo				El cliente es el niño de un trabajador agrícola migrante. Los servicios de ortodoncia del cliente se retrasaron como resultado de estar

mésticos				temporalmente en el cuidado de la custodia estatal (cuidado de crianza).
----------	--	--	--	--

Criteria				
<p>Nivel I: Dedicado a la resolución de los primeros signos de maloclusión hándicap en la dentición mixta temprana que puede afectar significativamente la salud de la dentición en desarrollo, el hueso alveolar y el crecimiento simétrico del marco esquelético. (La presencia de los molares permanentes maxilares y mandibulares, así como los incisivos maxilares y mandibulares completamente en erupción, y los dientes caducifolios constituirán la dentición mixta temprana.)</p> <p>**Las excepciones para los casos de dentición mixta pueden considerarse cuando el plan de tratamiento incluye extracciones de dientes primarios restantes o en el caso del paladar hendido.</p> <ul style="list-style-type: none"> • Travesía anterior que se asocia con inflamación gingival grave clínicamente aparente y/ o recesión gingival, o desgaste severo del esmalte. • Travesía posterior con una desviación de línea media asociada y patrón de cierre asimétrico. 				

LEVEL II:				
Códigos CDT	Tipo de proveedor	Grupo de edad	Duración del tratamiento	Excepciones al tiempo de tratamiento esperado
D8050 Tratamiento ortodoncia interceptivo de la dentición primaria	Tipo 48 Tipo 90	3-13	Hasta 22 visitas mensuales y se espera que se completen en un plazo de 24 meses a menos que se conceda una excepción.	<ul style="list-style-type: none"> • Puede permitir meses de tratamiento adicionales para una de las siguientes circunstancias: • El cliente es hijo de un trabajador agrícola migrante. • Los servicios de ortodoncia del cliente se retrasaron como resultado de estar temporalmente en cuidado de custodia estatal (orfanato)
D8060 Tratamiento ortodoncia interceptivo de la dentición transicional				
D8070 Ortodoncia integral tratamiento de la dentición transicional				

			Criteria
Nivel II: Dedicado a la resolución de maloclusión de minusválidos en la dentición transicional; la fase final de la transición de la dentición primaria a adolescente en la que los dientes permanentes sucedáneos están emergiendo o a punto de emerger.			
CUATRO de las siguientes condiciones deben ser claramente evidentes en la documentación justificativa:			
<ul style="list-style-type: none"> • Maloclusión completa de la cúspide clase II con la cúspide bucal distal del primer molar maxilar ocluyendo en el surco bucal mesial del primer molar mandibular. • Maloclusión completa de la cúspide clase III con el primer molar maxilar ocluyendo en la cúspide bucal distal molar mandibular primero o en la inclinación distal de la cúspide bucal molar molar de mandibular. • La medida de la sobremordida deberá de ser superior a 5 mm. • La medida de sobrejet deberá de ser superior a 8 mm. <ul style="list-style-type: none"> • Más de cuatro dientes congénitamente ausentes, uno o más de los cuales incluirán un diente/o dientes anteriores. • El hacinamiento anterior deberá de ser superior a 6 mm. en el arco mandibular. • Mordedura cruzada anterior de al menos dos de los cuatro incisivos maxilares. • Espaciado generalizado en ambos arcos de más de 6 mm. en cada arco. <ul style="list-style-type: none"> • Reconocimiento de caninos maxilares o caninos de impacto temprano. Las radiografías apoyarán el diagnóstico que demuestre una angulación mesial grave del canino en erupción y la corona del canino superpuesto y cruzando la imagen del incisivo lateral maxilar. 			
<p align="center">Servicios Adicionales</p> <p>Puede haber circunstancias atenuantes que justifiquen un tiempo de tratamiento adicional, incluyendo pero no limitado a casos de anomalías craneofaciales y paladar hendido. En caso de que el cliente requiera tratamiento adicional, el proveedor puede solicitar autorización previa para servicios adicionales. Cada caso será revisado y evaluado caso por caso por necesidad médica.</p> <p>Los proveedores deben completar y presentar lo siguiente para su consideración por servicios adicionales:</p> <ul style="list-style-type: none"> • Un formulario de reclamación ADA 2012 o posterior con el código de procedimiento D8670 para visitas adicionales mensuales de ortodoncia, si es necesario. • En el formulario de reclamo de ADA identifique el motivo de las visitas mensuales adicionales necesarias e identifique el número de visitas que se solicitan. • El nombre del aparato adicional en el caso de un plan de tratamiento de paladar hendido, si es necesario. • Radiografías recientes (radiografías) que muestran los progresos realizados hasta la fecha. • Fotografías actuales • Plan de Tratamiento actual 			
NIVEL III			
<p>❖ Los clientes son elegibles para los servicios de ortodoncia de nivel II, III o IV una vez por vida.</p>			

<p>❖ Los Clientes identificados como casos hendidura/craneofacial son elegibles para más de un nivel de servicios de ortodoncia (Nivel II, III y IV) por vida.</p>				
Código's CDT	Tipo de Proveedor	Grupo de Edad	Duracion del Tratamiento	Excepciones al tiempo de tratamiento esperado
D8080 Tratamiento de ortodoncia integral de la dentición adolescente	Tipo 48	13-20	Hasta 22 visitas mensuales y se espera que se completen dentro de los 36 meses a menos que se conceda una excepción.	Puede permitirse meses de tratamiento adicionales para una de las siguientes circunstancias: <ul style="list-style-type: none">•El cliente es hijo de un trabajador agrícola migrante.•Los servicios de ortodoncia del cliente se retrasaron como resultado de estar temporalmente en la custodia estatal (orfanato).
Criteria				

Nivel III: Dedicado a la resolución de la maloclusión de discapacitados en la dentición adolescente o adulta; erupción completa de la dentición permanente con la posible excepción de la erupción completa de los segundos molares.

CUATRO de las siguientes condiciones deben ser claramente evidentes en la documentación justificativa.

- Maloclusión molar de clase II completa como se describe en el nivel II.
- Maloclusión molar de clase III completa como se describe en el nivel II.
- Impacto dental anterior; sin problemas con evidencia radiográfica para apoyar un diagnóstico de impacto (falta de espacio eruptivo, angularmente malpuesto, totalmente incrustado en el hueso) en comparación con los dientes anteriores eclípticos que pueden ser maluestos, pero ha estallado en la cavidad oral y no es un elemento calificador.
- El hacinamiento anterior será superior a 6 mm en el arco mandibular.
- La mordedura abierta anterior demostrará que todos los incisivos maxilares y mandibulares no tienen contacto oclusal y están separados por una medida superior a 6 mm.
- La mordedura abierta posterior deberá demostrar una separación vertical mediante una medición superior a 5 mm. de varios dientes posteriores y no confundirse con la erupción natural retardada de unos pocos dientes.
- Se calificará la picadura cruzada posterior con una desviación de línea media asociada y un cambio mandibular, una mordedura de Brodie con un arco mandibular totalmente gravado por un arco maxilar que se superponga bucalmente ocluyendo, o un arco maxilar posterior totalmente mal posicionado al arco mandibular.
- La mordedura cruzada anterior incluirá más de dos incisivos en la picadura cruzada y demostrará inflamación gingival, recesión gingival o desgaste severo del esmalte.
- La sobremordida será superior a 5 mm.

- El sobrejet deberá superar los 8 mm

Servicios Adicionales

Puede haber circunstancias atenuantes que justifiquen un tiempo de tratamiento adicional, incluyendo pero no limitado a casos de anomalías craneofaciales y paladar hendido. En caso de que el cliente requiera tratamiento adicional, el proveedor puede solicitar autorización previa para servicios adicionales. Cada caso será revisado y evaluado caso por caso por necesidad médica.

Los proveedores deben completar y enviar lo siguiente para consideración a servicios adicionales:

- Un formulario de reclamación ADA 2012 o posterior con el código de procedimiento D8670 para visitas adicionales mensuales de ortodoncia, si es necesario.
- En el formulario de reclamo de ADA identifique el motivo de las visitas mensuales adicionales necesarias e identifique el número de visitas que se solicitan.
- El nombre del aparato adicional en el caso de un plan de tratamiento de paladar hendido, si es necesario.
- Radiografías recientes (radiografías) que muestran los progresos realizados hasta la fecha.
- Fotografías actuales
- Plan de Tratamiento actual

NIVEL IV

- ❖ Los Clientes son elegibles para servicios de ortodoncia de nivel II, III o IV una vez por vida.
- ❖ Los Clientes identificados como casos de hendidura/craneofacial son elegibles para más de un nivel de servicios de ortodoncia (Nivel II, III y IV) por vida.

Código's CDT	Tipo de Proveedor	Grupo de Edad	Duración del Tratamiento	Excepciones al tiempo de tratamiento esperado
D8090 Tratamiento de Ortodoncia Integral de la dentición adulta.	Tipo 48	13-20	Hasta 22 visitas mensuales y se espera que se completen en un plazo de 36 meses a menos que se conceda una excepción.	Puede permitirse meses de tratamiento adicionales para una de las siguientes circunstancias: <ul style="list-style-type: none"> • El cliente es hijo de un trabajador agrícola migrante. • Los servicios de ortodoncia del cliente se retrasaron como resultado de estar temporalmente en el cuidado de la custodia estatal (cuidado temporal).
Criteria				

- Maloclusión de clase II no funcional
- Maloclusión no funcional clase III

La corrección de la maloclusión deberá estar más allá de la de la ortodoncia por sí sola y requerirá procedimientos pre-ortodoncia y post-ortodoncia junto con la cirugía ortognática, las necesidades médicas del paciente se basarán en la función y no en la estética.

Servicios Adicionales

Puede haber circunstancias atenuantes que justifiquen un tiempo de tratamiento adicional, incluyendo pero no limitado a casos de anomalías craneofaciales y paladar hendido. En caso de que el cliente requiera tratamiento adicional, el proveedor puede solicitar autorización previa para servicios adicionales. Cada caso será revisado y evaluado caso por caso por necesidad médica.

Los proveedores deben completar y presentar lo siguiente para su consideración por servicios adicionales:

- Un formulario de reclamación ADA 2012 o posterior con el código de procedimiento D8670 para visitas adicionales mensuales de ortodoncia, si es necesario.
- En el formulario de reclamo de ADA identifique el motivo de las visitas mensuales adicionales necesarias e identifique el número de visitas que se solicitan.
- El nombre del aparato adicional en el caso de un plan de tratamiento de paladar hendido, si es necesario.
- Radiografías recientes (radiografías) que muestran los progresos realizados hasta la fecha.
- Fotografías actuales
- Plan de Tratamiento actual

Nivel IV: Dedicado a la resolución de maloclusión incapacitada en la dentición adulta; erupción completa de la dentición permanente. La documentación será presentada por un cirujano oral que justifique la necesidad médica de un enfoque quirúrgico del tratamiento.

Reembolso

El reembolso del tratamiento ortodoncia se basa en la presentación de los códigos de procedimiento apropiados:

D8210, D8220, D8050, D8060, D8070, D8080 o D8090

- Se considerará para el pago como el reembolso inicial cuando se hayan colocado todas las bandas, soportes y/o aparatos y se haya iniciado el tratamiento activo.
- El trabajo de diagnóstico se considera parte de este reembolso inicial.
- El trabajo de diagnóstico se considera parte de este reembolso inicial.

Código de procedimiento D8670: Visita periódica del tratamiento de ortodoncia

- Limitado a un servicio por mes.
- El número total de ajustes mensuales permitidos variará según el nivel aprobado del tratamiento de ortodoncia.
- No podrá presentarse únicamente para una visita observacional.

Código de procedimiento D8680: Retención de ortodoncia - eliminación de aparatos, construcción y colocación de retenedor(es).

- Se considerará para el pago como el último pago cuando el tratamiento de ortodoncia esté completo y haya sido autorizado previamente.
Los casos denegados no serán reembolsados.

Finalización de todos los niveles de tratamiento ortodoncia

- Se requiere autorización previa para completar el tratamiento (último pago) y debe ser revisada para obtener pruebas de finalización del caso.
- Los proveedores deben usar el código de procedimiento D8680 para la eliminación de todas las bandas, corchetes y dispositivos. Los servicios de ortodoncia niveles II, III y IV deben incluir la construcción de retenedores maxilares y mandibulares.
- La siguiente documentación debe presentarse con la solicitud de autorización previa:
 - Un formulario de reclamación ADA 2012 o más nuevo con el código de procedimiento D8680
 - Imagen radiográfica panorámica posterior al tratamiento
 - Fotografías
 - Una declaración firmada del Proveedor tratante que indica que el tratamiento está completo

Transferencia/Continuación de la Atención Ortodoncia

Hay 3 escenarios principales que este documento abordará en cuanto a la continuación o transferencia del tratamiento ortodoncia en curso de un miembro:

1. Proveedor a Proveedor (dentro de UHC Dental)
2. Otros DMO a UHC Dental
3. Acuerdo privado/comercial con UHC Dental

1) Proveedor a Proveedor (dentro de UHC Dental):

Esta sección es para situaciones en las que el cuidado de ortodoncia de un miembro elegible de Medicaid se transfiere de un proveedor dental de UHC a otro proveedor dental de UHC (en el que hay registro de la aprobación del tratamiento de ortodoncia original)

La autorización previa emitida a un proveedor para servicios de ortodoncia no es transferible a otro proveedor. El nuevo proveedor debe solicitar una nueva autorización previa para completar el tratamiento iniciado por el proveedor original.

El nuevo proveedor debe obtener sus propios registros, que deben presentarse con la solicitud de transferencia de servicios.

- Requisitos de presentación de la documentación:
 - Toda la documentación necesaria para la solicitud original
 - ADA 2012 o formulario de reclamación más nuevo con el código de procedimiento D8999 y el número de visitas restantes (D8670) que necesitan ser prestados.
 - La razón por la que el cliente dejó el proveedor anterior y una narrativa señalando el estado del tratamiento.

2) Otro DMO a UHC Dental:

Esta sección es para situaciones en las que la atención de ortodoncia de un miembro elegible de Medicaid se transfiere de otra organización de TX Dental Medicaid (DMO) a la DMO de UHC Dental

La continuación de un caso para un cliente que comenzó con otro DMO se considerará para aquellos miembros con una autorización previa activa no caducada para el tratamiento de ortodoncia, hasta la cantidad y validez aprobada por el transportista anterior

- Requisitos de presentación de documentación:
- Un formulario completo de continuación ortodoncia de cuidado. Consulte el Apéndice K para este formulario.
- ADA 2012 o formulario de reclamación más nuevo con el código de procedimiento D8999 y el número de visitas restantes (D8670) que deben representarse.
- Una copia de la aprobación previa del Miembro, incluida la tarifa total aprobada del caso y la estructura de pago
- Historial de pagos detallado

3) Acuerdo privado/comercial para UHC Dental:

Esta sección es para situaciones en las que la atención ortodoncia de un miembro elegible actualmente de Medicaid se transfiere de un Acuerdo Privado/Comercial a UHC Dental DMO, sólo si el cliente comenzó el tratamiento antes de convertirse en elegible para Medicaid.

La continuación de un caso de ortodoncia para un cliente que comenzó el tratamiento a través de un acuerdo privado no se considerará para la autorización previa si el cliente comenzó el tratamiento mientras Medicaid es elegible y será negado.

La continuación de un caso de ortodoncia para un cliente que comenzó a través de un acuerdo privado/comercial también necesitará revisión de la necesidad médica, y debe cumplir con los criterios de Medicaid para la necesidad médica de tratamiento de ortodoncia

- Requisitos de presentación de documentación:

- Un formulario completo de continuación del cuidado de ortodoncia. Consultee el Apéndice K para Este formulario.
- ADA 2012 o formulario de reclamación más nuevo con el código de procedimiento D8999 y el número de visitas restantes (D8670) que necesitan ser prestados.
- Una copia de la aprobación previa del Miembro, incluida la tasa total aprobada del caso y la estructura de pago
- Historial de pagos detallado

- Estos documentos de presentación adicionales también serán requeridos para revisar por necesidad médica cuando se esté considerando un caso orto etario iniciado en un acuerdo privado/comercial para la continuación de la cobertura de atención:

- Modelos de diagnóstico digital u otro tipo de imágenes diagnósticas 3D
- Radiografías (rayos X)
- Imagen radiográfica cefalométrica con trazados
- Fotografías
- Plan de tratamiento
- **Solo para clientes de CHIP** – una copia de la carta de aprobación de autorización previa médica para la cirugía

Terminación prematura de servicios integrales de ortodoncia

La terminación prematura del tratamiento ortodoncia integral por parte del proveedor de tratamiento servicios integrales.

La terminación prematura de los servicios de ortodoncia incluye todo lo siguiente:

- Eliminación de soportes y alambres de arco
- Otros aparatos especiales de ortodoncia
- Fabricación de aparatos especiales de ortodoncia
- Entrega de retenedores de ortodoncia

La extracción prematura de un aparato de ortodoncia debe estar autorizada previamente, y las solicitudes deben incluir:

- Se ha eliminado un formulario de reclamación ADA 2012 o posterior con el código de procedimiento D8680, para identificar que todas las bandas, corchetes y aparatos han sido eliminados y se han entregado retenedores de ortodoncia aplicables.

1. Un formulario de liberación (o copia de) que debe ser firmado por el padre o tutor legal, o por el cliente si tiene 18 años o más o un menor emancipado.

- Una de las siguientes opciones debe documentarse en la solicitud de autorización previa:
 - El cliente no coopera o no cumple
 - El cliente solicitó la eliminación de los aparatos de ortodoncia(s)
 - El cliente ha solicitado la eliminación debido a circunstancias atenuantes para incluir, pero no limitado a:
- Encarcelamiento
- Complicaciones de salud mental con una recomendación del médico tratante
- Colocación de cuidados de crianza
- Hijo de un trabajador agrícola migrante, con la intención de completar el tratamiento en una fecha posterior si continúa la elegibilidad de Medicaid para los servicios de ortodoncia

*NOTA: Un Miembro para quien se haya autorizado la eliminación de un aparato debido a lo anterior, será elegible para completar sus servicios de ortodoncia de Medicaid si los servicios se vuelven a iniciar mientras Medicaid es elegible. Si el Miembro decide que se eliminan los aparatos por razones distintas a las mencionadas anteriormente debido a circunstancias atenuantes, el cliente **puede no** ser elegible para ningún servicio adicional de ortodoncia de Medicaid.*

- El proveedor solicitante es responsable de la eliminación de los aparatos de ortodoncia, registros finales y fabricación y entrega de retenedores en el momento de la eliminación prematura o en cualquier momento futuro si el cliente se presenta a la oficina del proveedor tratante.
- En el caso de una terminación prematura autorizada del tratamiento, el proveedor debe presentar el código de procedimiento D8680 para identificar que todas las bandas, corchetes y aparatos han sido eliminados y se han entregado retenedores de ortodoncia aplicables.

Documentación

Todas las visitas de tratamiento de ortodoncia deben documentarse en el registro dental del cliente y estar disponibles para su revisión
